# WARDROBES

---

The Gliss Master series of wardrobes, designed by Vincent van Duysen in 2016, extends its possibilities, offering a wardrobe with advanced features where the main focus is on the materials. Innovative niches for the frame , the back panels (Fine Grain or Rafia) and the doors (Graf ato bronze or silica). Absolute novelty: an all-glass back panel that is inserted into a metal frame where a patented hinge enables it to open 180°. Thanks to Glass doors and transparent glass side panels, fully glazed wardrobes can be achieved. Wood or lacquered doors with new (Niche) handles. New design for the raised sets of drawers, also in a doublesided version, featuring a practical handle (Hold) with Ecopelle or Fine Grain nish front panels. New Ecopelle and glass shelves with or without LED lighting.
